Special Issue on Spouted Beds

Preface • Norman Epstein

Articles

- A Discussion on Minimum Spout Velocity and Jet Penetration Length • Hsiaotao T. Bi
- Determination of Minimum Spouting Velocities in Conical Spouted Beds • Zhiguo Wang, Hsiaotao T. Bi, C. Jim Lim and Pengcheng Su
- Numerical Simulations of the Effect of Conical Dimension on the Hydrodynamic Behaviour in Spouted Beds • He Yurong, Zhao Guangbo, Jacques Bouillard and Lu Huilin
- Validation of a Discrete Particle Model in a 2D Spout-Fluid Bed Using Non-Intrusive Optical Measuring Techniques • Jeroen Link, Christiaan Zeilstra, Niels Deen and Hans Kuipers
- Characterization of Gas Spouted Beds Using the Rescaled Range Analysis • Jian Xu, Xiaojun Bao, Weisheng Wei, Shikong Shen, H. T. Bi, J. R. Grace, and C. J. Lim
- Analysis of Regime Transitions and Flow Instabilities in Vertical Conveying of Coarse Particles Using Different Solids Feeding Systems • Ione. A. Costa, Maria do Carmo. Ferreira and José. T. Freire
- Identification of Flow Regimes in Slot-Rectangular Spouted Beds using Pressure Fluctuations • Luis A.P. Freitas, Ozkan M. Dogan, C. Jim Lim, John R. Grace and Dingrong Bai
- Voidage Profiles in a Slot-Rectangular Spouted Bed • Luiz A.P. Freitas, Kenji Mitsutani, C. Jim Lim, John R. Grace and Weisheng Wei
- Flow Characteristics in Slot-Rectangular Spouted Beds with Draft Plates • Baolin Luo, C. Jim Lim, Luis A. P. Freitas and John R. Grace
- Influence of Operating Parameters on the Average Spout Width in Two-Dimensional Spouted Beds • Éverton F. Zanoelo, Sandra C. S. Rocha and Daiton F. Rezende
- Residence Time Distributions in Staged Spouted Beds • Enrique Arriola, Carlos Francisco Cruz-Fierro, Khaled Hamed Alkhalidi, Brian Patrick Reed and Goran Jovanovic
- Behaviour of Cohesive Powders in a Powder-Particle Spouted Bed • Toshifumi Ishikura, Hiroshi Nagashima and Mitsuharu Ide
- Removal of SO₂ in Semi-Dry Flue Gas Desulfurization Process with a Powder-Particle Spouted Bed • Tsutomu Nakazato, Yunyi Liu and Kunio Kato
- The Use of a Population Balance Model in the Study of Inoculation of Soybean Seeds in a Spouted Bed • Claudio R. Duarte, Marcos, Valéria V. Murata and Marcos A. S. Barrozo
- Effect of the Equipment Configuration and Operating Conditions on Process Performance and on Physical Characteristics of the Product During Coating in Spouted Bed • M.C.P. Publio and W.P. Oliveira
- Microcapsule Processing in a Spouted Bed • Marcela M. Baracat, Adriana M. Nakagawa, Luis A. P. Freitas and Osvaldo de Freitas
- Drying of Liquid Feedstocks in a Spout-Fluid-Bed with Draft-Tube Submerged in Inert Solids: Hydrodynamics and Drying Performance • G. Osorio-Revilla, R. Elías-Serrano and T. Gallardo-Velázquez
- Simultaneous Drying and Cleaning of Guava Seeds in a Spout-Fluid Bed with Draft Tube • G. Osorio-Revilla, T. López-Suárez and T. Gallardo-Velázquez

The Effect of Operating Conditions and Design Parameters on the Dynamic Behaviour of Agitated Pulp Stock Chests •

Farhad Ein-Mozaffari, Leonardo C. Kammer, Guy A. Dumont and Chad P.J. Bennington

3 Phase Transformation and Rheological Behaviour of Highly Paraffinic "Waxy" Mixtures • Dharmendra Tiwary and Anil K. Mehrotra

4 Antimony Solubility and Speciation in Aqueous Sulphuric Acid Solutions at 298 K • Jesús M. Casas, Gloria Crisóstomo and Luis Cifuentes

11 Isomérisation du *n*-hexane sur des catalyseurs Ni-WO_x/Al₂O₃-SiO₂ • Miloud Guemini, Yacine Rezgui, Ahcene Bouchemma et Ammar Tighezza

20 Effect of Water on a-Methylstyrene Hydrogenation on Pd/Al₂O₃ • Valérie Meille and Claude de Bellefon

30 Removal of VOCs by Sorption in Fixed Beds of Popcorn • Vivian W.Y. Mak, Ioannis Chatzis, Robert R. Hudgins and Muhammad E. Fayed

37 Process Design Aspects of Jet Mixers • Ashwin W. Patwardhan and Amit R. Thatte

Book Review

Hydrodynamics, Mass and Heat Transfer in Chemical Engineering by A.D. Polyanin, A.M. Kutopov, A.V. Vyazmin and D.A. Kazeninn • Reviewed by Rajendra P. Chhabra

48 Art and Science: Newton's 3rd Law: Action = Reaction • Abraham Tamir and Guy Tamir

April 2004

Articles

- Turbulence Modulation in Gas-Particle Flows: A Comparison of Selected Models • Marilyn F. Lightstone and Sarah M. Hodgson
- Analysis and Interpretation of Multiple Radioactive Particle Tracking Data on Laboratory Scale Air/Polyethylene Fluidized Beds • Loni Schober and Apostolos Kantzas
- Pressure Fluctuation Analysis of Laboratory Scale Air/Polyethylene Fluidized Beds • Loni Schober, Apostolos Kantzas and Ron Hugo
- Bubble Motion Pattern and Rise Velocity in Two-dimensional Horizontal and Vertical Vibro-fluidized Beds • Tao Zhou, Hironao Ogura, Masato Yamamura and Hiroyuki Kage
- Factors Affecting Stable Operation of Counter-current Multistage Fluidized Bed of Solid-liquid System – Dimensions of Downspout • Hideaki Tokuyama, Masayuki Natsume, Susumu Nii, Fumio Kawaizumi and Katsuroku Takahashi
- Emulsion Analysis in a Gas/Liquid/Liquid Reactor With Top Blowing • Margarita Martín, Manuel Rendueles and Mario Díaz
- Suggestion of a New Correlation for the Height of Shallow Dispersion Bed Formed in a Rotating Disc Contactor • Parissa Khadiv-Parsi and Mohammad-Ali Moosavian
- LDA Measurements on a Turbulent Gas/Liquid/Fibre Suspension • Johan Pettersson and Anders Rasmuson
- The Two-Phase Flow in an Axially Stirred Vessel Investigated Using Phase-Doppler Anemometry • Mattias Ljungqvist and Anders Rasmuson
- Some Characteristics of Stirred Vessel Flows of Dilute Polymer Solutions Powered by a Hyperboloid Impeller • A. S. Cavadas and F. T. Pinho
- Low Inclination Oil-water Flows • Jason Y.-L. Lum, Jonathon Lovick and Panagiota Angeli
- A Composite Heat Transfer Model For Pool Boiling on a Horizontal Tube at Moderate Pressure • Sarit K. Das and Wilfried Roetzel

Articles

- Turbulence Modulation in Gas-Particle Flows: A Comparison of Selected Models • Marilyn F. Lightstone and Sarah M. Hodgson
- Analysis and Interpretation of Multiple Radioactive Particle Tracking Data on Laboratory Scale Air/Polyethylene Fluidized Beds • Loni Schober and Apostolos Kantzas
- Pressure Fluctuation Analysis of Laboratory Scale Air/Polyethylene Fluidized Beds • Loni Schober, Apostolos Kantzas and Ron Hugo
- Bubble Motion Pattern and Rise Velocity in Two-dimensional Horizontal and Vertical Vibro-fluidized Beds • Tao Zhou, Hironao Ogura, Masato Yamamura and Hiroyuki Kage
- Factors Affecting Stable Operation of Counter-current Multistage Fluidized Bed of Solid-liquid System – Dimensions of Downspout • Hideaki Tokuyama, Masayuki Natsume, Susumu Nii, Fumio Kawaizumi and Katsuroku Takahashi
- Emulsion Analysis in a Gas/Liquid/Liquid Reactor With Top Blowing • Margarita Martín, Manuel Rendueles and Mario Díaz
- Suggestion of a New Correlation for the Height of Shallow Dispersion Bed Formed in a Rotating Disc Contactor • Parissa Khadiv-Parsi and Mohammad-Ali Moosavian
- LDA Measurements on a Turbulent Gas/Liquid/Fibre Suspension • Johan Pettersson and Anders Rasmuson
- The Two-Phase Flow in an Axially Stirred Vessel Investigated Using Phase-Doppler Anemometry • Mattias Ljungqvist and Anders Rasmuson
- Some Characteristics of Stirred Vessel Flows of Dilute Polymer Solutions Powered by a Hyperboloid Impeller • A. S. Cavadas and F. T. Pinho
- Low Inclination Oil-water Flows • Jason Y.-L. Lum, Jonathon Lovick and Panagiota Angeli
- A Composite Heat Transfer Model For Pool Boiling on a Horizontal Tube at Moderate Pressure • Sarit K. Das and Wilfried Roetzel

Synthesis and Analysis of Triphenylamine: A Review • Touraj Manifar and Sohrab Rohani	323
Measurement and Prediction of the Solubility of Stearic Acid Polymorphs by the UNIQUAC Equation • Mahmoud Mirmehrab and Sohrab Rohani	335
A New Method for Identifying Osmotically Limited and Gel Layer Controlled Pressure Independent Flux in Ultrafiltration • S.K. Zaidi, S.K. Karode, D. Kirpalani and A. Kumar	343
Reverse Micellar Extraction of Lysozyme Using Two Dialkyl Sodium Phosphinates • Youn-Ok Shin and Juan H. Vera	349
Evaluation of Polyester Resin as a New Compatibilizer for SBR/PVC Blends • S.L. Abd-El-Messieh, S.H. Mansour, D. El-Nashar and N.E. Ikliadous	358
A Laboratory Reactor for Gas-Phase Olefin Polymerization • Tariq M. Mannan, Hassan Hammawa, David T. Lynch and Sieghard E. Wanke	371

R&D Notes

A General Correlation for the Rise Velocity of Single Gas Bubbles • Denis Rodrigue	382
Numerical Investigation of Resonance Behaviour of a Tubular Packed-Bed Reactor with Non-Uniform Activity • Attasak Jaree, Robert R. Hudgins, Hector Budman, Peter L. Silveston and Michael Menzinger	387
A Model for Residence Time Distribution of Solids in a Rotary Kiln • Loni Dinesh V. and P.S.T. Sai	392
Heat Transfer to an Isolated Bubble Rising in a High-Temperature Incipiently Fluidized Bed • Wenyuan Wu and Pradeep K. Agarwal	399
Analysis of Pre-filter Based Closed-loop Control-relevant Identification Methodologies • C. Shreesha and Ravindra D. Gudi	406
Art and Science: Newton's 1st Law via Paintings and Music • Abraham Tamir	416

June 2004

Articles

Stability of Homogeneous Fluidization Under Extreme Conditions of Operation • Piero Foscolo and Larry Gibilaro	417
Size Segregation of Nickel Pellets Flowing into a Packed Bed • Paul A. Moysey, Nadella V. Rama Rao and Malcolm H. I. Baird	424
Development of a Continuous High-Efficiency Laboratory Fibre Fractionator • Edmond Young and James A. Olson	433
Bubble Formation at a Rotating Cylindrical Surface in Cross-Flowing Liquid • Piotr M. Machniewski, Andrzej K. Biń and Geoffrey M. Evans	442
Drying of Suspensions in the Draft Tube Spouted Bed • Zorana Lj. Arsenijević, Zeljko B. Grbavčić and Radmila V. Garić -Grušević	450
Gas-Liquid Mass Transfer in Pulp Retention Towers • Vilas B. Revatkar and Chad P.J. Bennington	465
Development of Two-point Dynamic Method for Evaluating Extraction Columns • Hongbo Li, Xiaojin Tang, Guangsheng Luo and Jiading Wang	471
Kinetics of Bitumen-Derived Gas Oil Upgrading Using a Commercial NiMo/Al ₂ O ₃ Catalyst • Christian Botchwey, Ajay K. Dalai and John Adjaye	478
Continuous Toluene Vapor Remediation in a Well-Mixed Bioreactor • Yonghong Bi, Gordon A. Hill and Robert J. Sumner	488
Effect of Inlet Type on Shear Stress and Mixing in an Annular	

Photobioreactor Involving a Swirling Decaying Flow • Jérémy Pruvost, Jack Legrand, Patrick Legentilhomme and Arnaud Muller-Feuga	495
Comparison of Internal and External Mixer Spargers in a Laboratory De-inking Flotation Column • C.A. Hardie, C. O. Gomez and J.A. Finch	504
Study of Tire Particle Mixing in a Moving and Stirred Bed Vacuum Pyrolysis Reactor • Jin Yang, Murlidhar Gupta, Xavier Roy and Christian Roy	510
Optimization of Reaction Conditions in a Fluidized-Bed for Silane Pyrolysis • Maria P. Tejero-Ezpeleta, Sigurd Buchholz and Lesław Mleczko	520
A Hydration Shell-Based Thermodynamic Model for Aqueous Two-Phase Systems • Pedro de Alcântara Pessôa Filho and Rahoma S. Mohamed	530
New Approach to Solve a Model for the Effective Solid Stress Distribution in Conical Spouted Beds • Esly F. Costa Jr., M. Laura Passos, Evaristo C. Biscaia Jr. and Giulio Massarani	539
Control of Spouted Bed Dryers • Nivaldo A. Corrêa, Carlos E. S. Costa, Ronaldo G. Corrêa and José T. Freire	555
Simulation and Modeling of Vegetable Market Wastes Pyrolysis Under Progressive Deactivation Condition • Ruby Ray, Pinaki Bhattacharya and Ranjana Chowdhury	566
Computer Simulations of Adsorption Characteristics of Carbon Dioxide in Slit Graphite Pores • Qingyuan Yang and Chongli Zhong	580
Multiobjective Optimization of Simulated Moving Bed Reactor and its Modification – Varicol Process • Hariprasad J. Subramani, Ziyang Zhang, Kus Hidayat and Ajay K. Ray	590
Neural and Hybrid Neural Modeling and Control of Fed-Batch Fermentation for Streptokinase: Comparative Evaluation under Nonideal Conditions • Pratap R. Patnaik	599

R&D Notes

Relationship between Riser and Downcomer Gas Holdups in Semi-batch Circulating Bubble Columns • Waheed A. Al-Masry, Abdullah A. Al-Dughaiter and Turki A. Al-Samari	607
MHD-Buoyancy Aiding and Opposing Flows with Viscous Dissipation Effects from Radiate Vertical Surfaces • H. M. Duwairi and Rebhi A. Damseh	613
Reaction Kinetics of Decomposition of Acidic Sodium Chlorite • Bal Raj Deshwal, Hang-Dae Jo and Hyung-Keun Lee	619
Art and Science: Evolution and Transformation • Abraham Tamir	624

August 2004

Special Issue on Oil Sands

Editorial • Jacob Masliyah	625
Oil Sands Extraction Research Needs and Opportunities • M.G. Lipsett	626
Understanding Water-Based Bitumen Extraction from Athabasca Oil Sands • Jacob Masliyah, Zhiang (Joe) Zhou, Zhenghe Xu, Jan Czarnecki and Hassan Hamza	628
Interaction between Bitumen and Fines in Oil Sands Extraction System: Implication to Bitumen Recovery • Jianjun Liu, Zhenghe Xu and Jacob Masliyah	655
Fines/Water Interactions and Consequences of the Presence of Degraded Illite on Oil Sands Extractability • Dean Wallace, Robert Tipman, Brad Komishke, Vince Wallwork and Ernie Perkins	667

Separation and Characterisation of Problematic Solids from Athabasca Oil Sands and Waste Unit Samples • Yun Tu, Zailong Li, Gerry Pleizier, Samson Ng and Keng H. Chung	678	Bubble Size Distributions for Dispersed Air – Water Flows in a 100 mm Horizontal Pipeline • R. Sean Sanders, M. Mahbubur Razzaque, Jason Schaan, K. Nandakumar, Jacob H. Masliyah, Artin Afacan and Shijie Liu	858
Processibility of Athabasca Oil Sand Using a Laboratory Hydrotransport Extraction System (LHES) • Vince Wallwork, Zhenghe Xu and Jacob Masliyah	687	Art and Science: The Many “Faces” of Love • Abraham Tamir I.B.C.	
Assessment of Bitumen Recovery from the Athabasca Oil Sands Using a Laboratory Denver Flotation Cell • Z. Zhou, T. Kasongo, Z. Xu and J. Masliyah	696	October 2004	
A Perspective on the Selection of Froth Treatment Processes • William E. Shelfantook	704	Articles	
Investigation of Oil Sands Froth Treatment • Uliana G. Romanova, Harvey W. Yarranton, Laurier L. Schramm and William E. Shelfantook	710	Flow Regime Identification in a Slurry Bubble Column from Gas Holdup and Pressure Fluctuations Analysis • S. Barghi, A. Prakash, A. Margaritis and M.A. Bergougnou	865
Effects of Sand Fraction on Toluene-diluted Heavy Oil in Water Emulsions in Turbulent Flow • Chandra W. Angle	722	Liquid Holdup and Pressure Drop Determination in Structured Packing with CFD Simulations • Ludovic Raynal, Christophe Boyer and Jean-Pierre Ballaguet	871
Factors Governing Friction Losses in Self-lubricated Transport of Bitumen Froth: 1. Water Release • R. Sean Sanders, Taehwan Ko, Runyuan Bai and Daniel D. Joseph	735	Determination of Decompression Wave Speed in Rich Gas Mixtures • Kamal K. Botros, Wojciech Studzinski, John Geerlgs and Alan Glover	880
A Bench-Scale Study of Conditioning Behaviour in Oil Sands Slurries • Waldemar I. Friesen, Tadeusz Dabros and Teddy Kwong	743	Mixing Time Studies in Multiple Impeller Agitated Reactors • Gopal R. Kasat and Aniruddha B. Pandit	892
A New Device to Determine Bitumen Extraction from Oil Sands • Manoj Luthra, Robert J. G. Lopetinsky, R. Sean Sanders, K. Nandakumar and Jacob H. Masliyah	752	A Method for Calculation of Final Film Thickness in Free Coating of Viscoelastic Fluids onto a Vertical Surface • Saeid Savarmand, Siroos Azizmohammadi, Ali Bahrami and Mohammad-Reza Golkar-Narenji	905
Monte Carlo Simulation of Coalescence Processes in Oil Sands Slurries • Waldemar I. Friesen and Tadeusz Dabros	763	Oxygen Transfer in a Baffled Rectangular Air-Lift Loop Reactor • Annabelle Couvert, Dominique Bastoul, Michel Roustan and Patrice Chatellier	914
Analysis of Solvent-Diluted Bitumen from Oil Sands Froth Treatment Using NIR Spectroscopy • Yicheng Long, Tadeusz Dabros and Hassan Hamza	776	Strategies for Starting Up Azeotropic Distillation Columns with Multiple Steady States • Sonia J. Benz, Javier A. Francesconi and Nicolás J. Scenna	920
A Two Level Fractional Factorial Design to Test the Effect of Oil Sands Composition and Process Water Chemistry on Bitumen Recovery from Model Systems • Nelson Fong, Samson Ng, Keng H. Chung, Yun Tu, Zailong Li, Bryan D. Sparks and Luba S. Kotlyar	782	Determination of Nucleation and Crystal Growth Kinetics in Hostile Environment – Application to the Tetravalent Uranium Oxalate $U(C_2O_4)_2 \cdot 6H_2O$ • Murielle Bertrand-Andrieu, Edouard Plasari and Pascal Baron	930
Rate of Bitumen Film Transfer from a Quartz Surface to an Air Bubble as Observed by Optical Microscopy • Dariusz Lelinski, Jaroslaw Drellich, Jan D. Miller and Jan Hupka	794	Kinetics and Combustion Characteristics of Deinking Sludge in a Thermobalance and an Internally Circulating Fluidized Bed • Won Namkung, Seon Ah Roh, Christophe Guy and Sang Dae Kim	939
Effect of Temperature on the Stability of Froth Formed in the Recycle Process Water of Oil Sands Extraction • Jaewon Choung, Justin Walker, Zhenghe Xu and Jacob Masliyah	801	Dehydration of Methanol to Dimethyl Ether by Catalytic Distillation • Weizhu An, Karl T. Chuang and Alan R. Sanger	948
Adhesion of Bitumen to a Metal Surface in a Flowing Oil Sands Slurry • Yuming Xu, Tadeusz Dabros, Waldemar I. Friesen, Waldemar B. Maciejewski and Jan Czarnecki	807	Analysis of Drying Kinetics of Iron Ores using Irreversible Thermodynamics and Transport Phenomena Principles • Idalmo M. Oliveira, Varadarajan Seshadri and Marcelo B. Mansur	956
Determining Bitumen Viscosity Through Drop Shape Recovery • Kevin Moran and Anthony Yeung	813	Experimental and Numerical Modeling Studies of Arsenic Removal with Wood Ash from Aqueous Streams • Mohammad H. Rahman, Nazimuddin M. Wasiuddin and M. Rafiqul Islam	968
Langmuir and Langmuir-Blodgett Asphaltene Films at Heptane-water Interface • Steven Lawrence, Li Yan Zhang, Zhenghe Xu and Jacob Masliyah	821	Water-Based Bitumen Recovery from Diluent-Conditioned Oil Sands • Jan Hupka, Jan D. Miller and Jaroslaw Drellich	978
Breaking Water-in-Bitumen Emulsions using Polyoxyalkylated DETA Demulsifier • Yuming Xu, Jiangying Wu, Tadeusz Dabros, Hassan Hamza, Sanyi Wang, Marianne Bidal, Johann Venter and Tom Tran	829	Dispositif de dépôt de couches de suspensions de céramiques appliqué à la stéréolithographie • Olivier Dufaud et Serge Corbel	986
A Novel Approach for Resolving Reverse Emulsions in SAGD Production Systems • Ron Bosch, Eric Axcell, Virgil Little, Robert Cleary, Sanyi Wang, Robert Gabel, and Bill Moreland	836	Transport of Gellan Gum Microbeads in Soil Columns of Various Grain Size Distributions • Peyman Moslemy, Denis Millette, Serge R. Guiot and Ronald J. Neufeld	994
The Conductivity and Dielectric Behavior of Solutions of Bitumen in Toluene • Ross S. Chow, Daniel L. Tse, and Koichi Takamura	840	Surface Tensions of Hydrocarbons and Bitumens at High Temperatures and Pressures • Jacques Millette, Donald S. Scott, Desmond Radlein, Jan Piskorz, Piotr Majerski, Irvine G. Reilly and T.J.W. deBruijn	1004
Hydrogen and Oxygen Bubble Attachment to a Bitumen Drop • Guoxing Gu, R. Sean Sanders, K. Nandakumar, Zhenghe Xu and Jacob H. Masliyah	846	Simulation de la distillation catalytique par un nouveau modèle de transfert – Application à la production d'acétate de méthyle	
Performance of Sand Slurry Pipelines in the Oil Sands Industry • R. Sean Sanders, Jason Schaan, Roxby Hughes and Clifton Shook	850		

- Florence Druart, Jean-Michel Reneaume, Michel Meyer et David Rouzineau 1014
A Modular Mixed-Integer Non-Linear Programming Algorithm for Synthesis of Chemical Processes • Hehua Li, Yu Qian, Shiqing Zheng and Huanong Cheng 1029

R&D Notes

- Holdup Profile in Multistage Stirred-Cell Liquid-Liquid Extraction Column Using Population Balance Model** • Ashraf S. Ismail 1037
Pressure Fluctuations in Jet Spouted Beds • Lii-ping Leu and Rong-Shyan Pan 1044
Homogeneous Fluidization Characteristics of Vibrating Fluidized Beds • Haibo Jin, Zemin Tong, Jiyu Zhang and Bijiang Zhang 1048
The Bed Expansion and Particle Velocity Analysis in the Swirling Fluidized Bed Combustor (SFBC) Cold Model • S. W. Lee and Y. Li 1054
Modelling Heterogeneous Slurry Flows at High Velocities • Randall G. Gillies, Clifton A. Shook and Jihuai Xu 1060
Power-Law Fluid Flow Over a Sphere: Average Shear Rate and Drag Coefficient • Maurice Renaud, Evelyne Mauret and Rajendra P. Chhabra 1066
Effect of Non-Newtonian Characteristics on Convective Liquid-Solid Heat Transfer in Packed and Fluidised Beds of Spherical Particles • Rupali Shukla and R.P. Chhabra 1071
Effects of Gas-Agitation and Packing on Hydrodynamics and Mass Transfer of Extraction Column • Jieming Xiong and Liping Zhang 1076
Wood Pulp as Model Fluid to Mimic the Oxygen Mass Transfer in *Aspergillus Niger* Fermentation • Nilesh Patel, Julie Goudreau, Shohini Bagchee and Jules Thibault 1081
A Novel Photometric Technique to Detect the Onset of Asphaltene Precipitation at Low Concentrations: the Effect of Maltenes and Water • Geza Horvath-Szabo, Jacob H. Masliyah and Jan Czarnecki 1089
Generalized Mathematical Modeling of Fluid-Solid Non-Catalytic Reactions Using Finite Volume Method: Multiple Reactions • Parthapratim Gupta and Ranjit Kumar Saha 1096
Art and Science: The Universe Through Science and Art • Abraham Tamir 1104
